

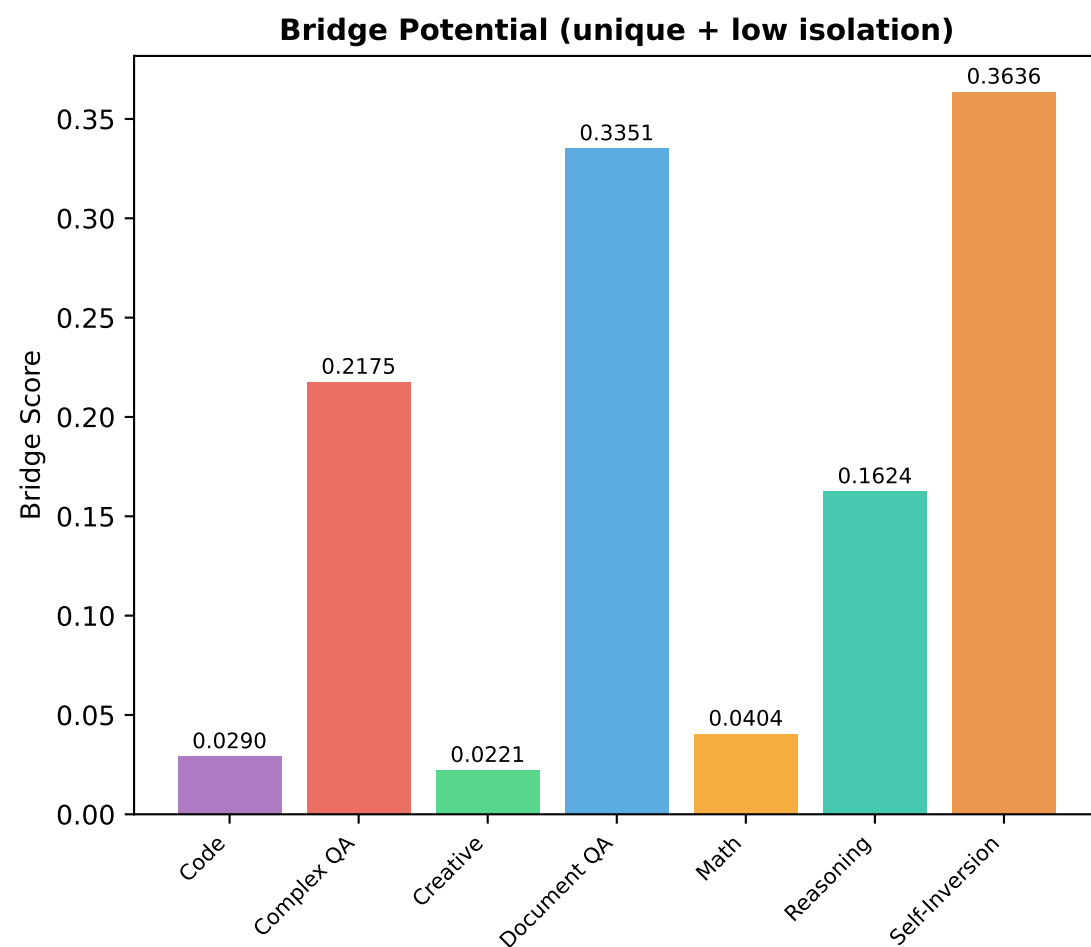

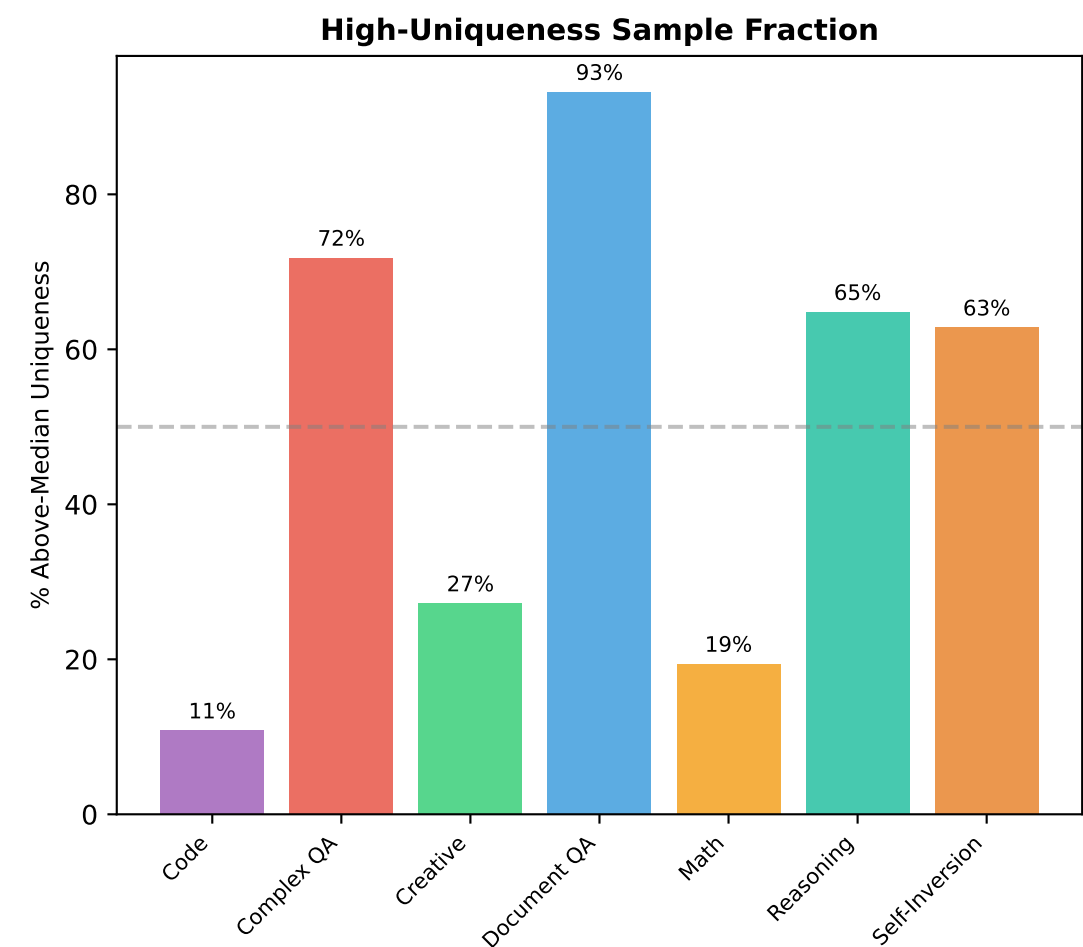

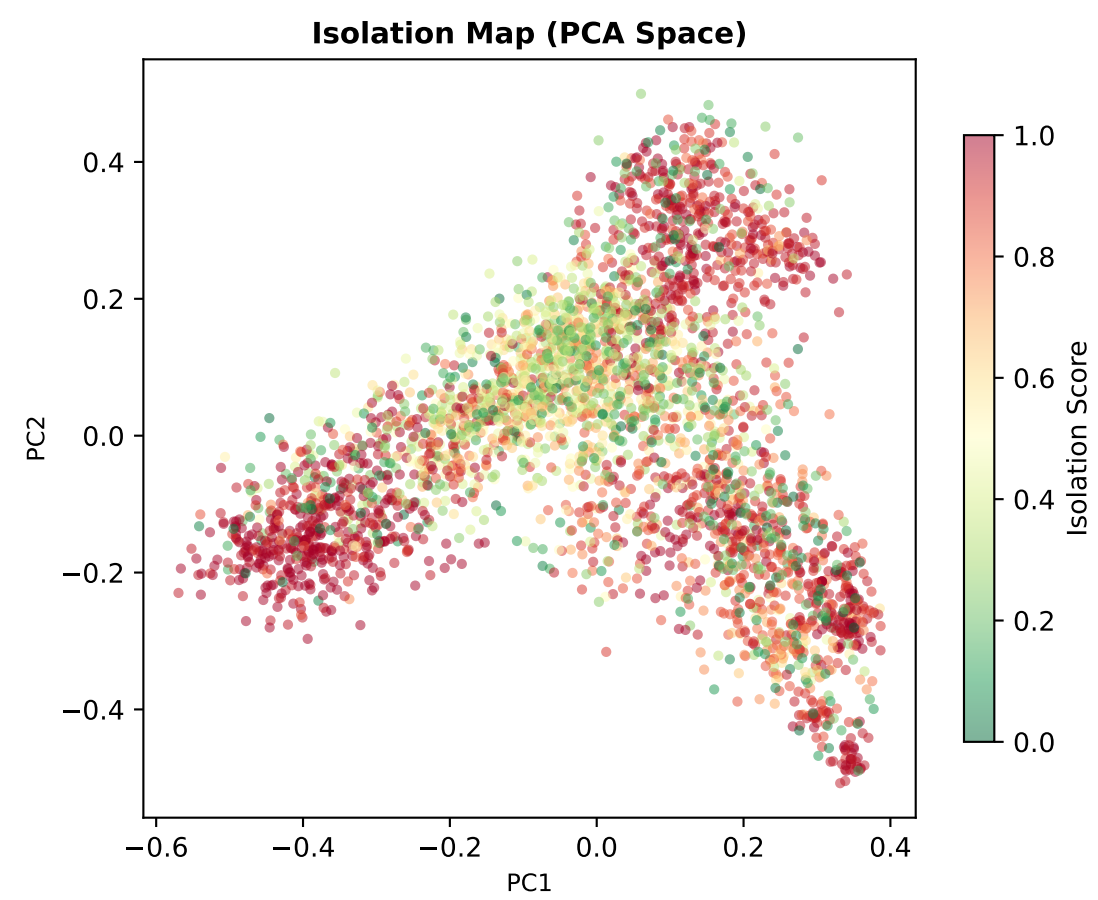

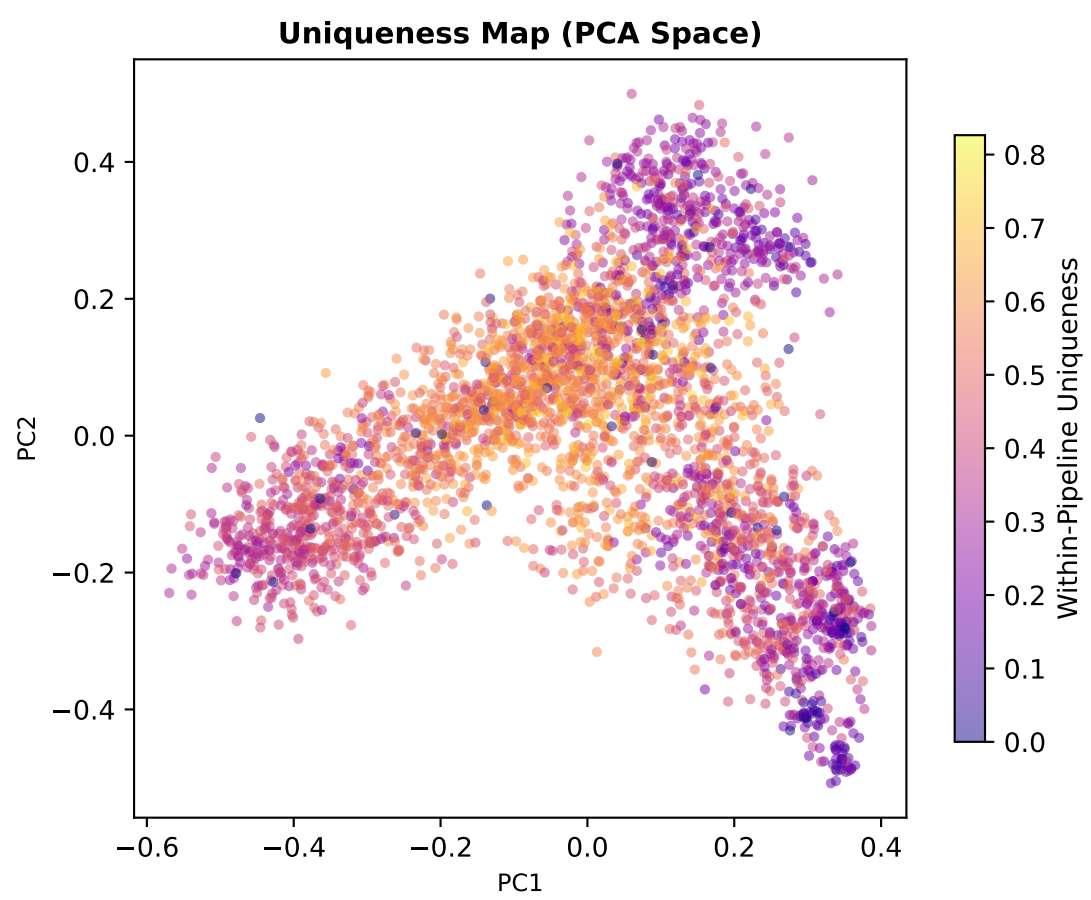

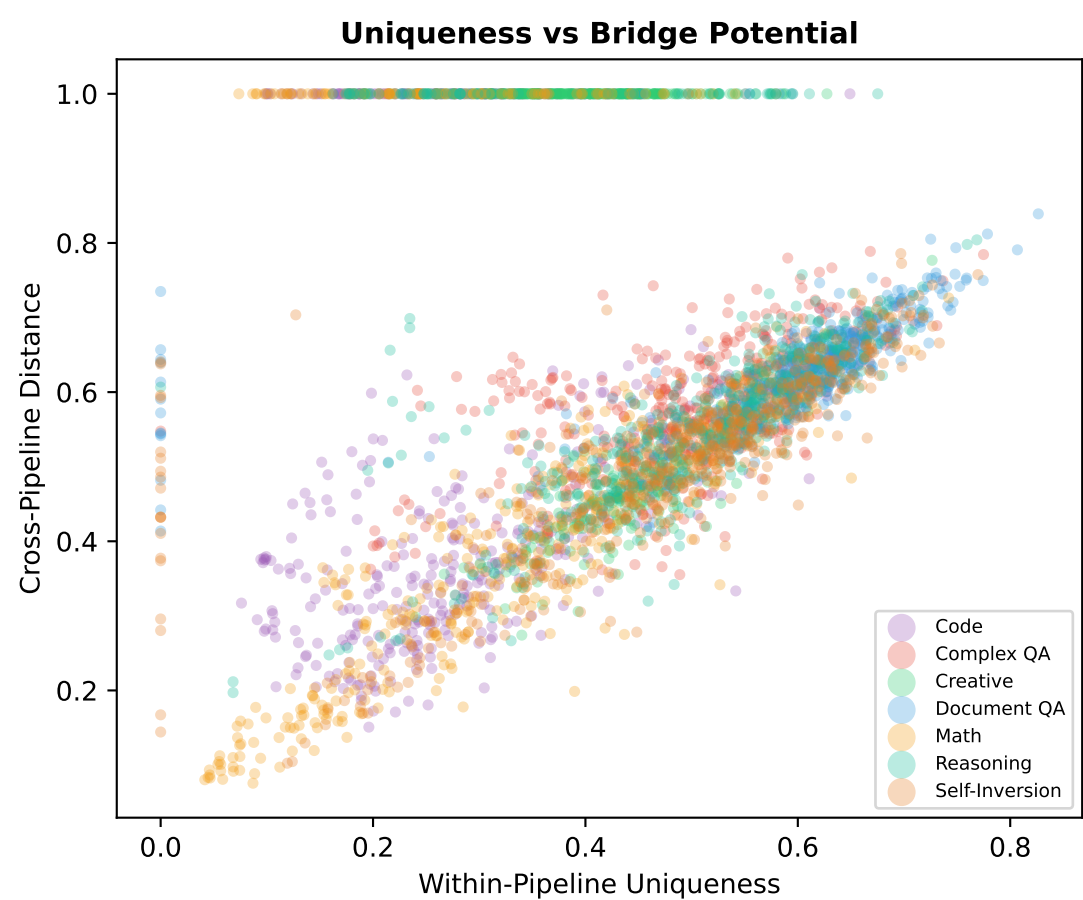

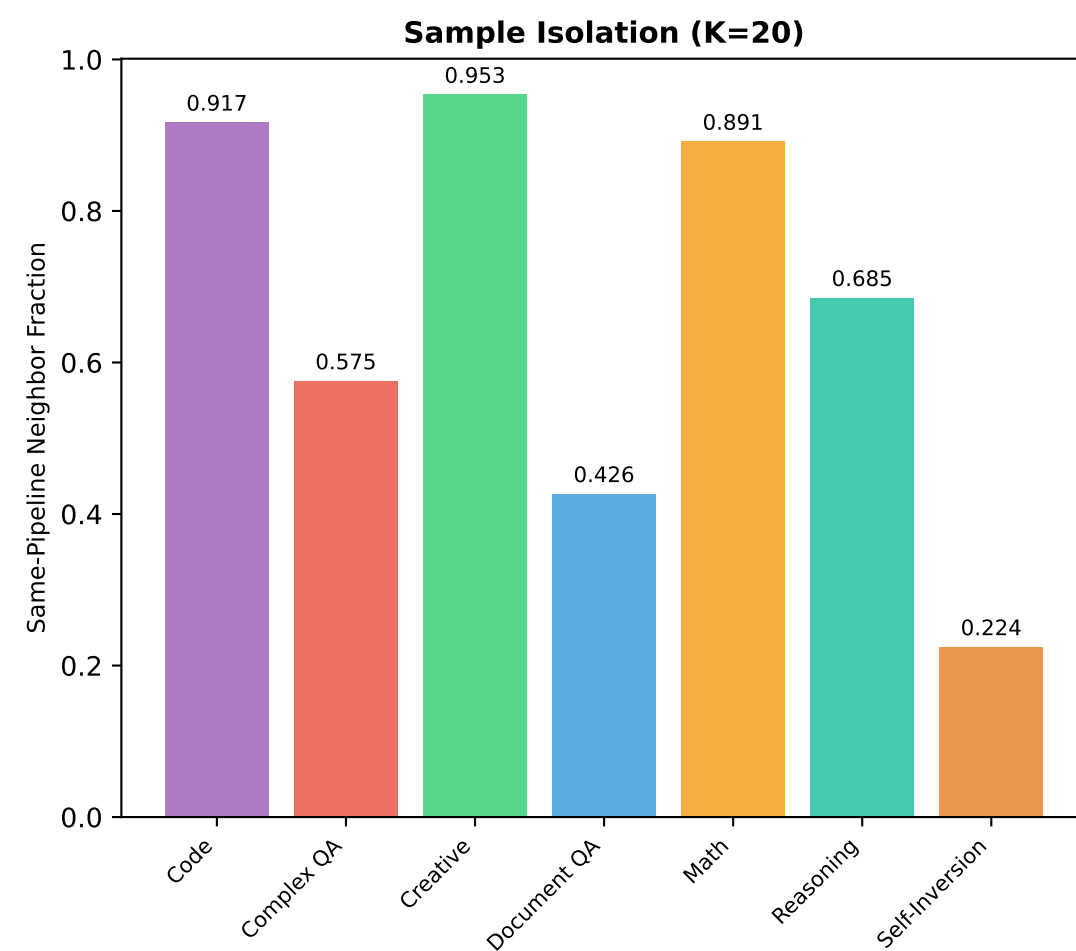

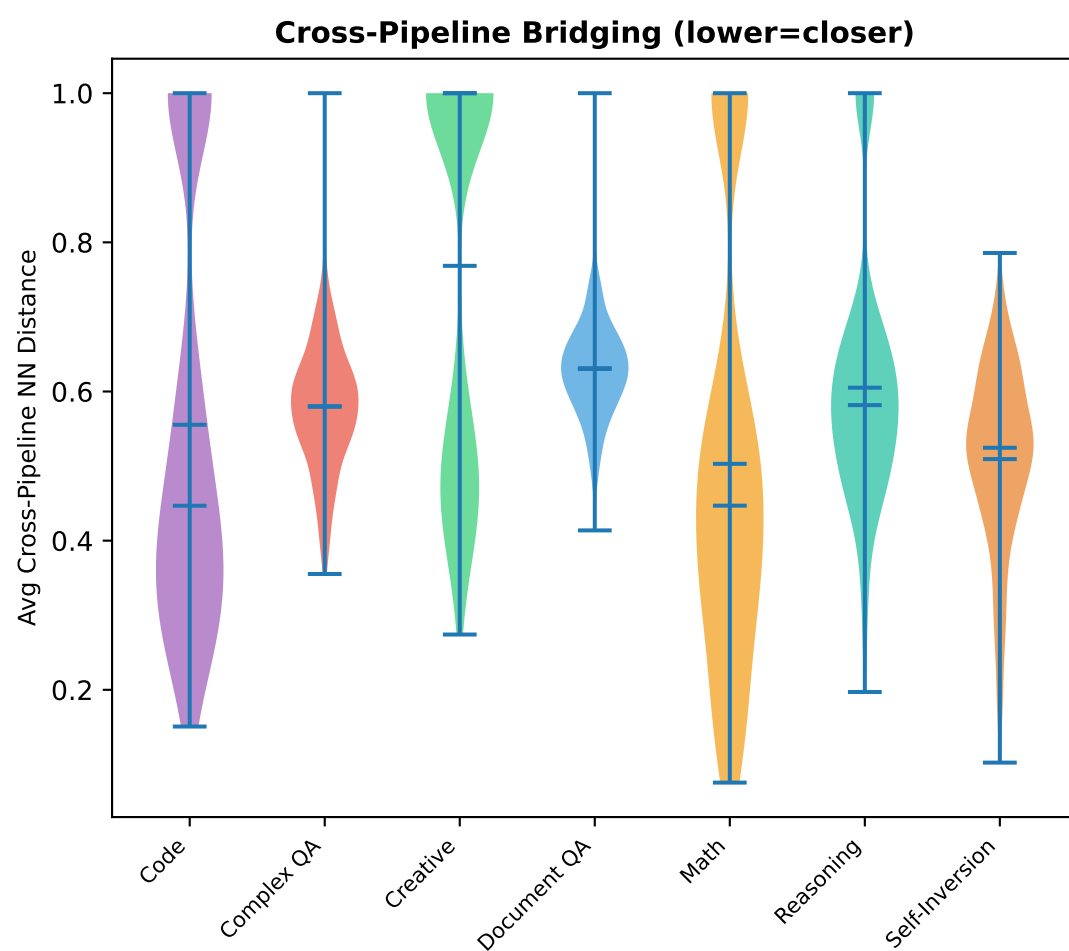

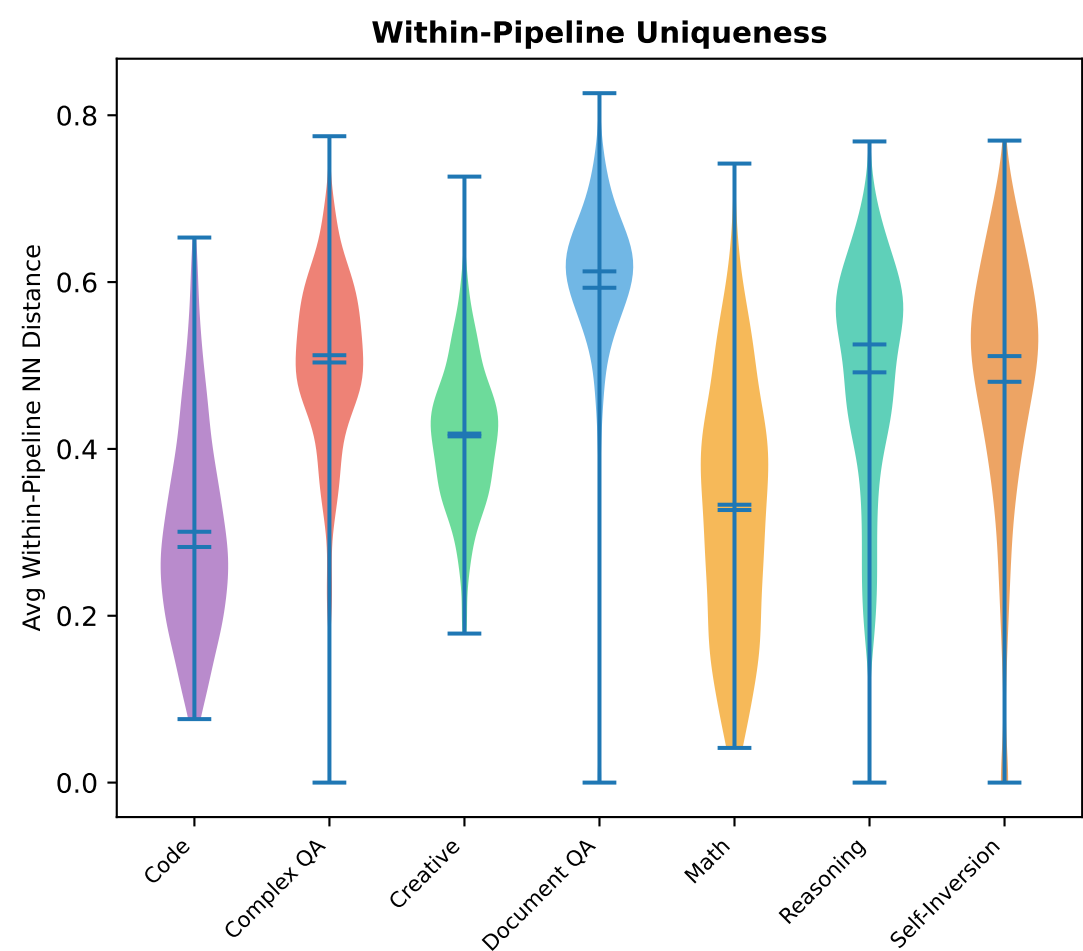

Fig 189: Sample Uniqueness & Bridge Potential Analysis

Sample Uniqueness Summary

Most internally unique: Document QA
Best bridge pipeline: Self-Inversion
Most isolated: Creative

Isolation ranking:
Creative: 0.953 (most)
Self-Inversion: 0.224 (least)

Key Insights:
1. Self-Inv samples are unique AND well-connected (best bridge)
2. Creative samples are unique but isolated (no bridge potential)
3. Code/Math highly self-similar
4. Uniqueness inversely correlates with pipeline size
