

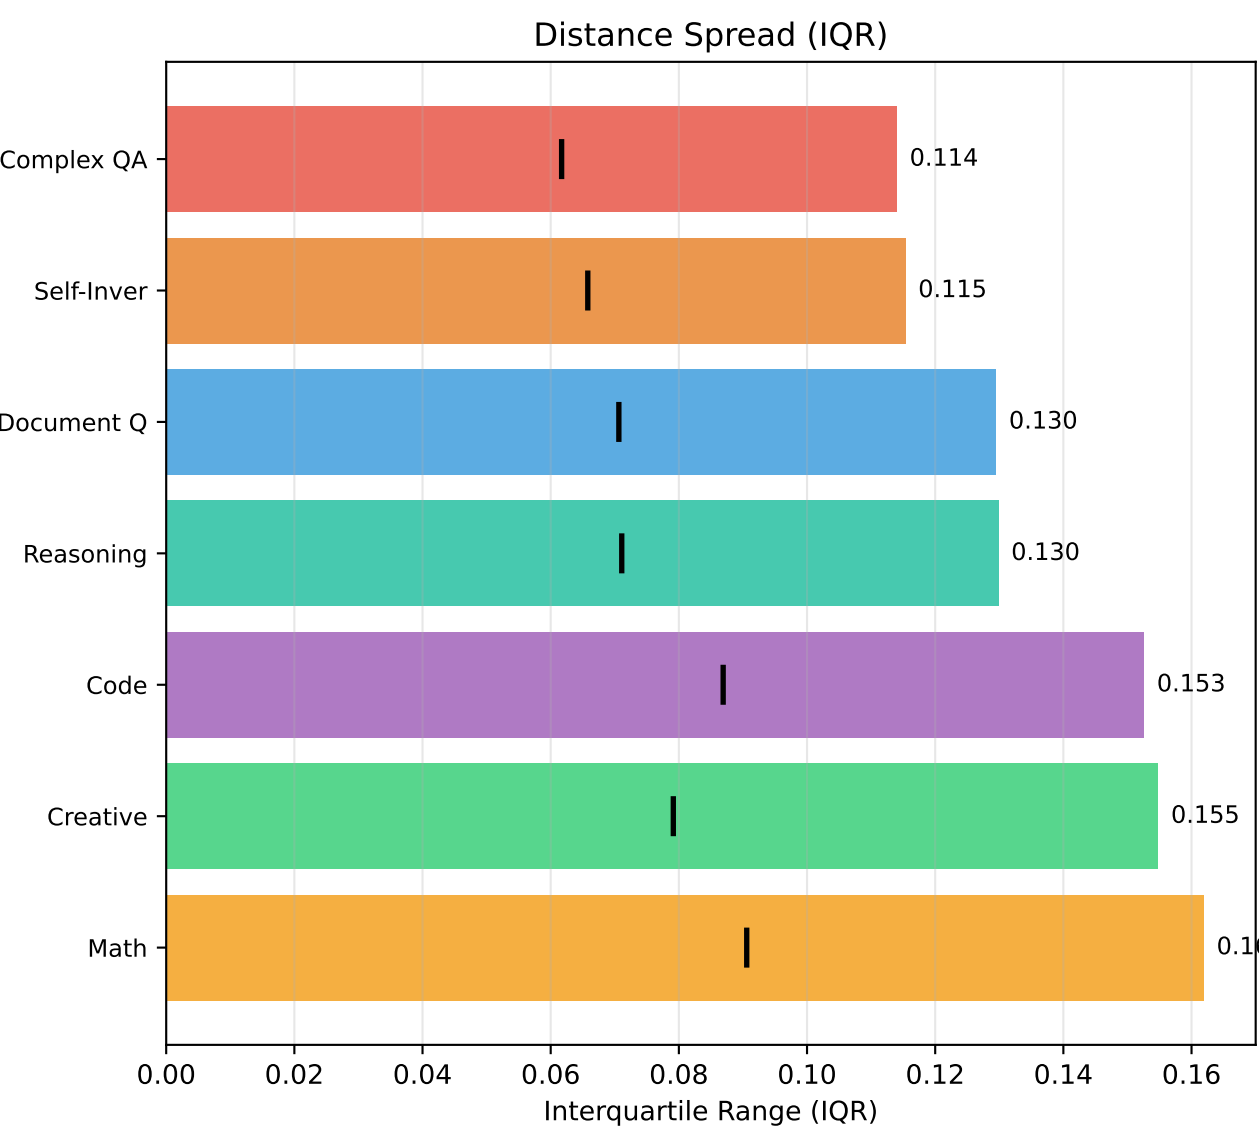

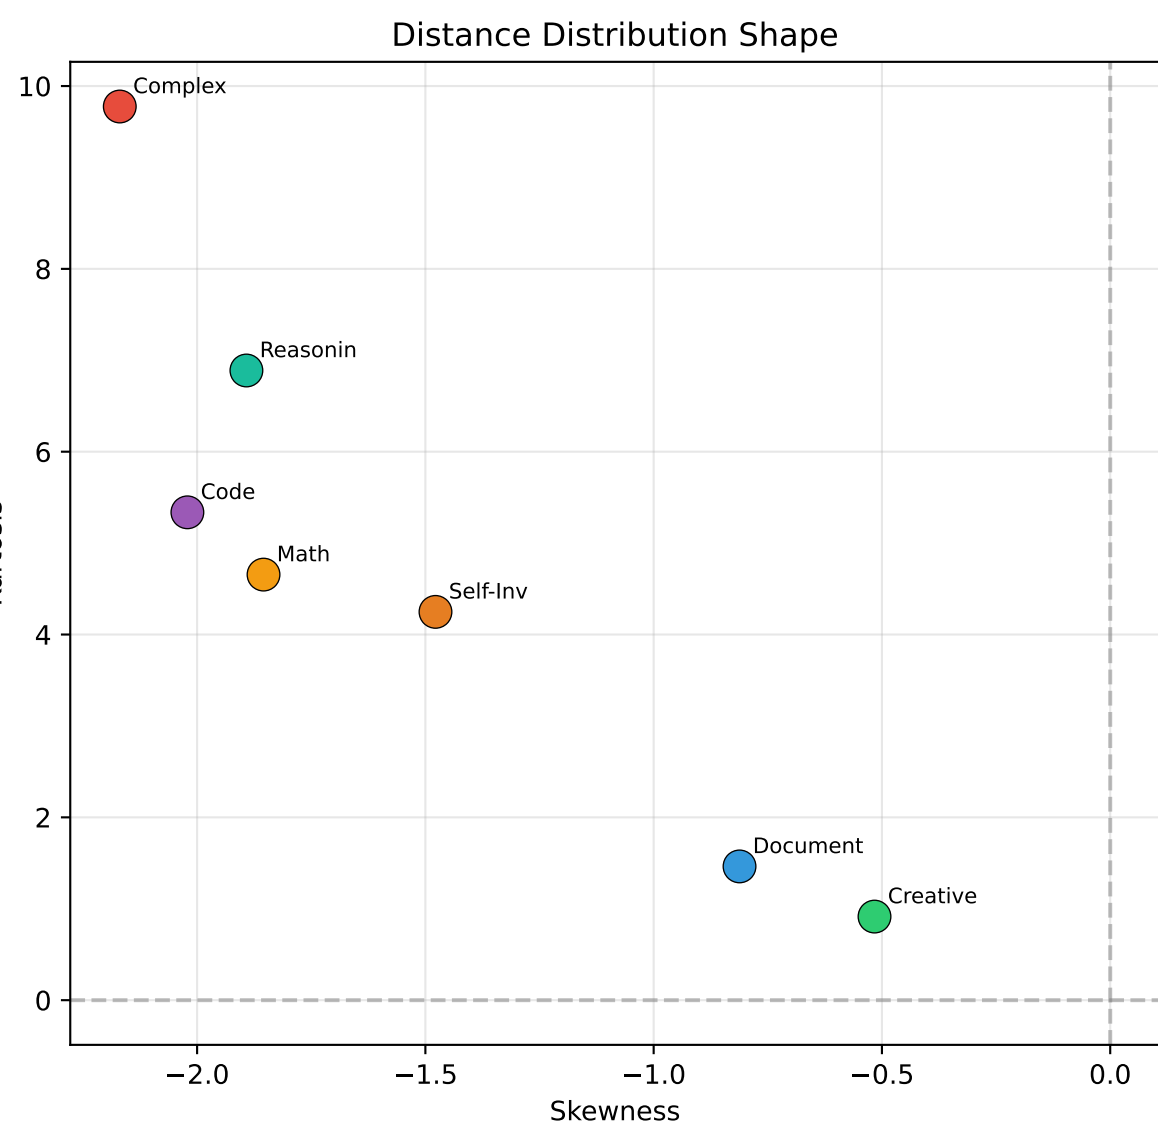

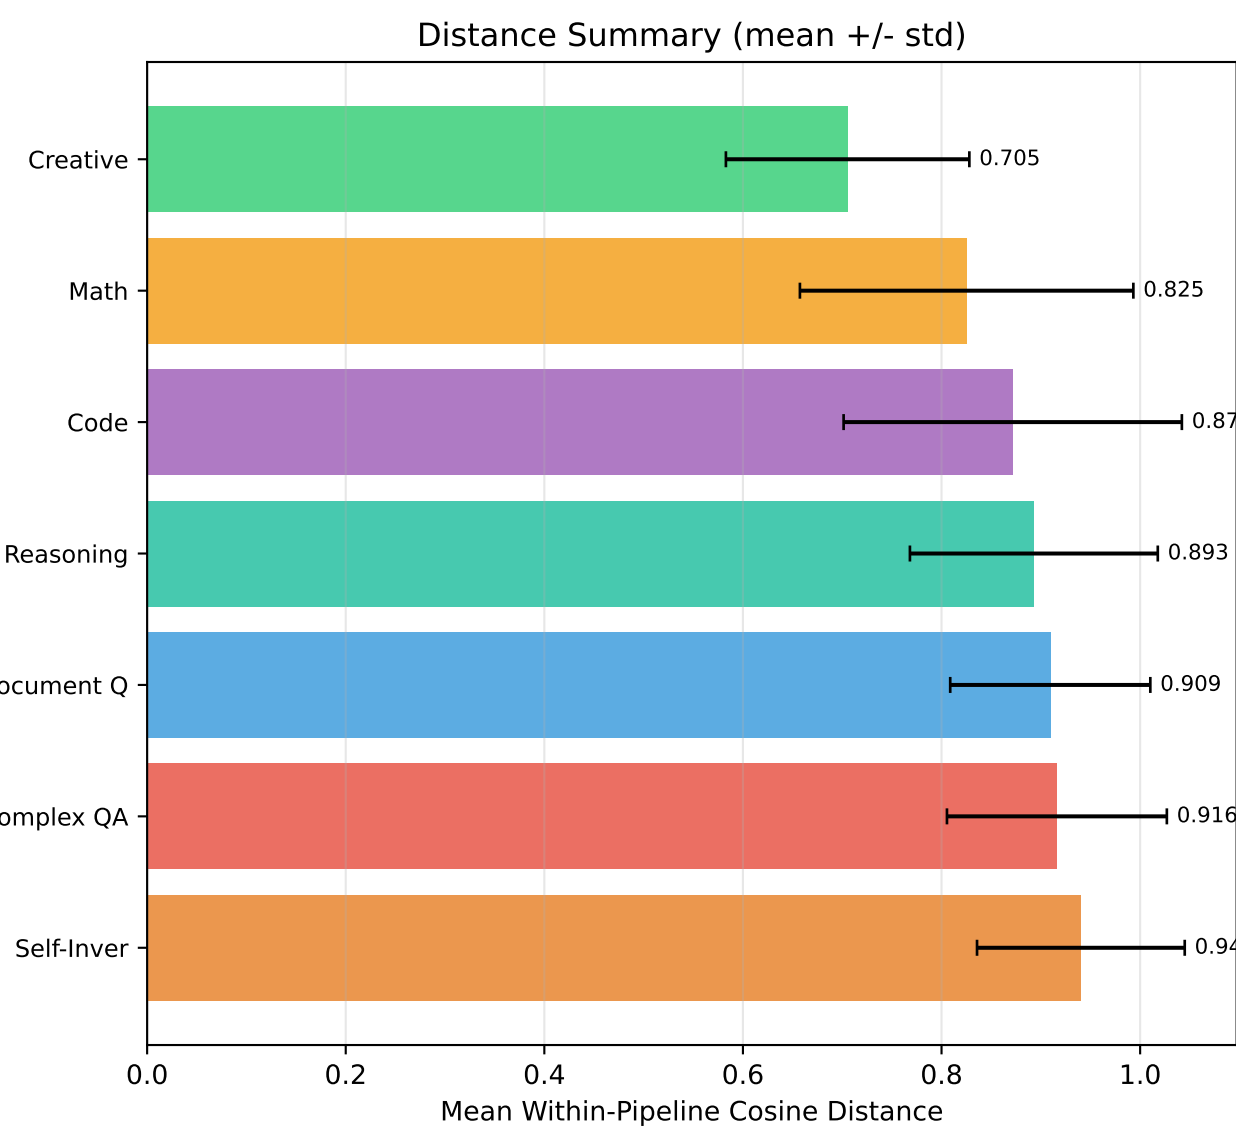

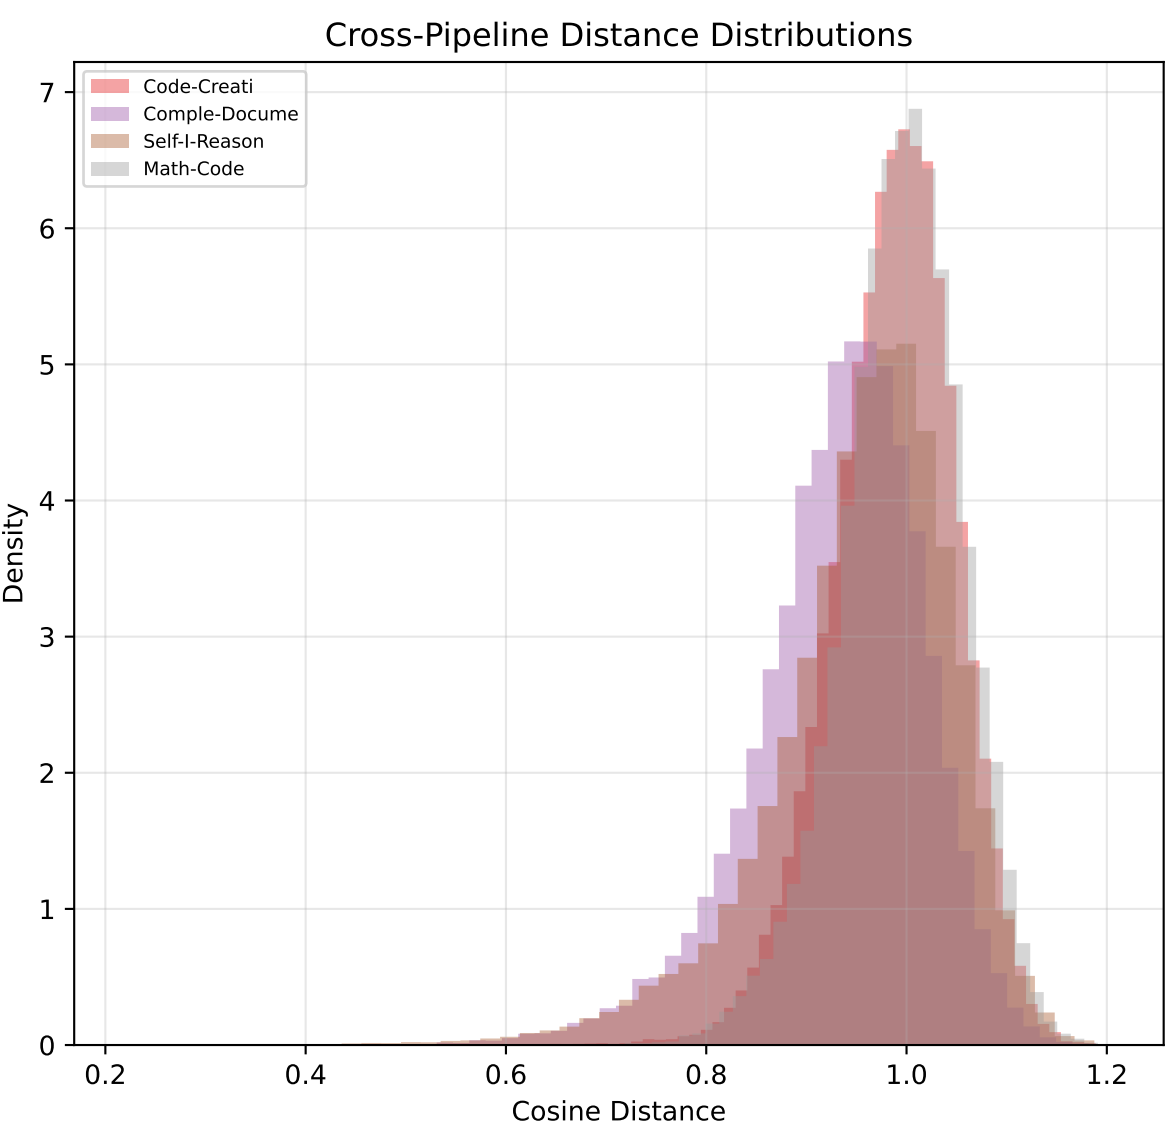

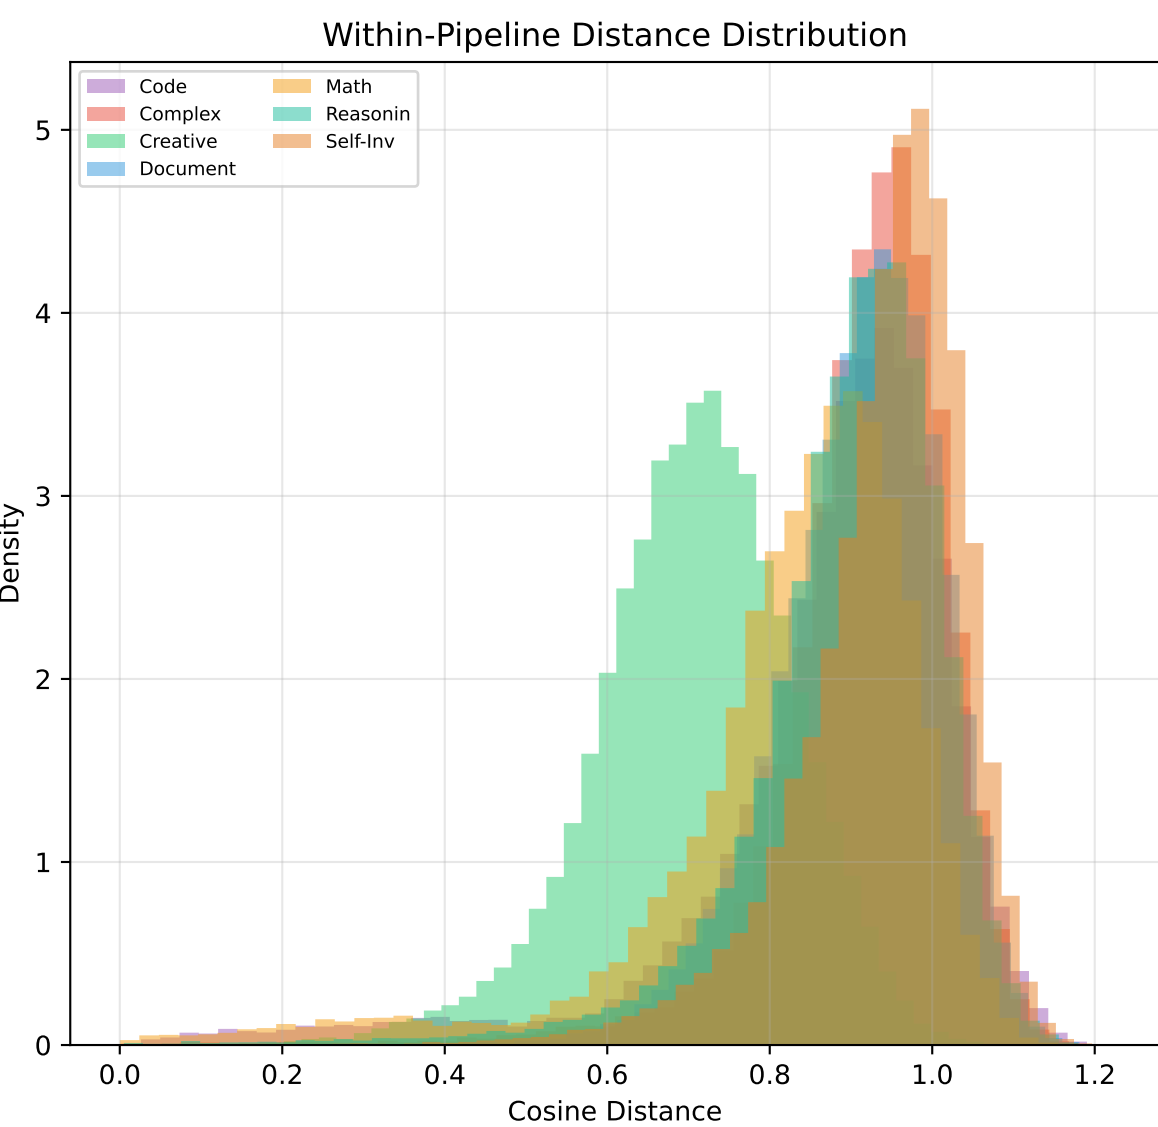

Fig 206: Embedding Distance Distribution Profile

Distance Distribution Summary

|                                  |                        |
|----------------------------------|------------------------|
| Within-pipeline distance (mean): |                        |
| Self-Inversi                     | 0.940 +/- 0.105        |
| Complex QA                       | 0.916 +/- 0.111        |
| Document QA                      | 0.909 +/- 0.101        |
| Reasoning                        | 0.893 +/- 0.125        |
| Code                             | 0.872 +/- 0.170        |
| Math                             | 0.825 +/- 0.168        |
| Creative                         | 0.705 +/- 0.123        |
| Distribution shape:              |                        |
| Code                             | left-skewed (sk=-2.02) |
| Complex QA                       | left-skewed (sk=-2.17) |
| Creative                         | left-skewed (sk=-0.52) |
| Document QA                      | left-skewed (sk=-0.81) |
| Math                             | left-skewed (sk=-1.85) |
| Reasoning                        | left-skewed (sk=-1.89) |
| Self-Inversi                     | left-skewed (sk=-1.48) |
| Widest spread: Math (IQR=0.162)  |                        |
| Tightest: Complex QA (IQR=0.114) |                        |
