

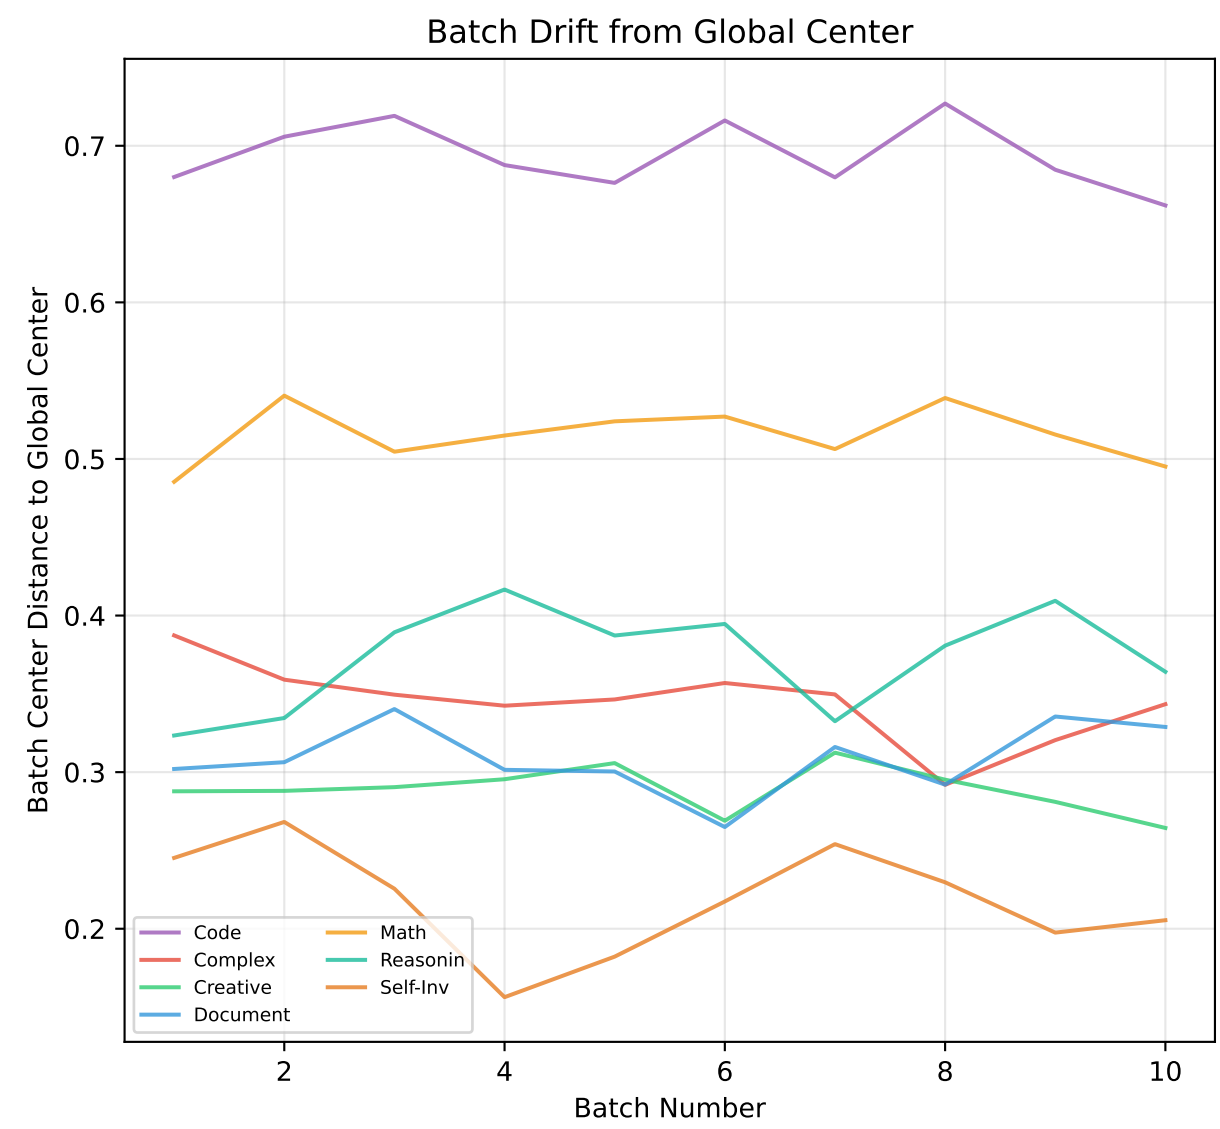

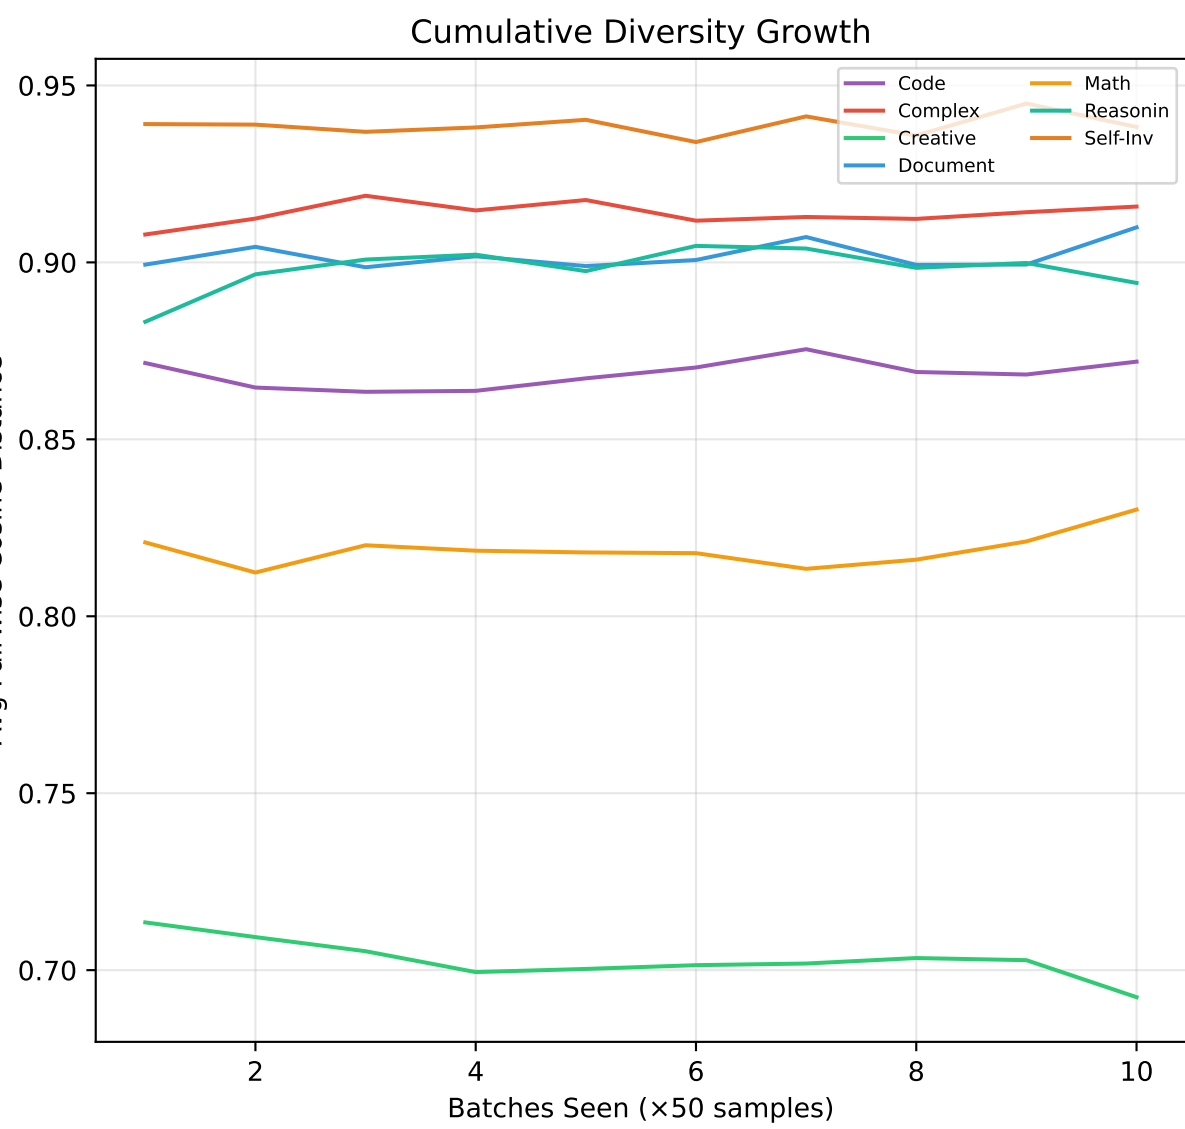

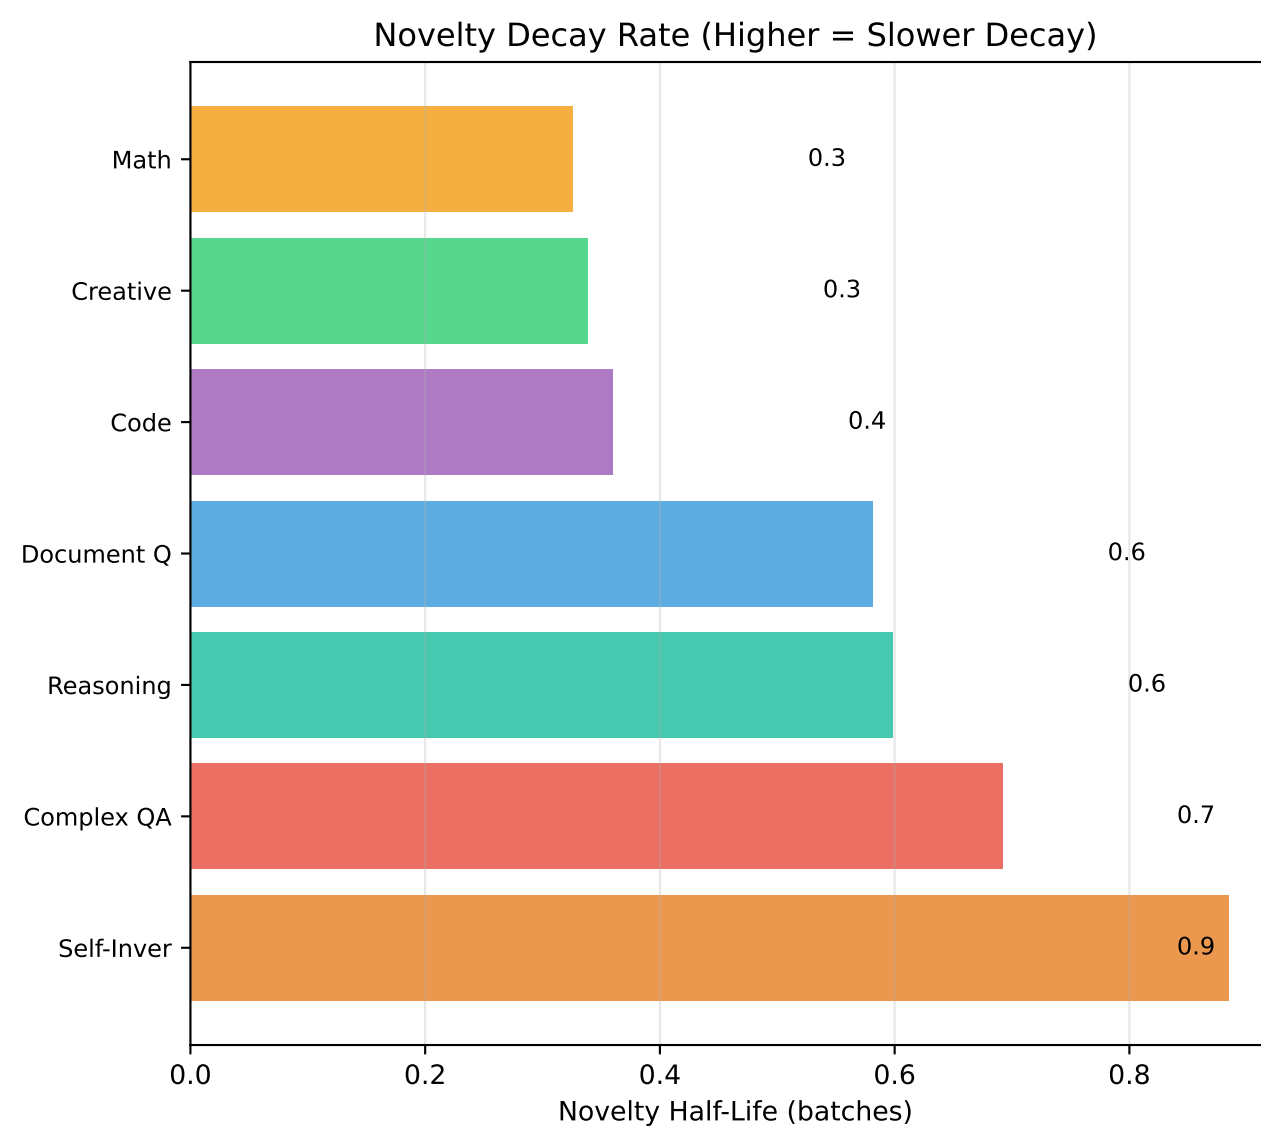

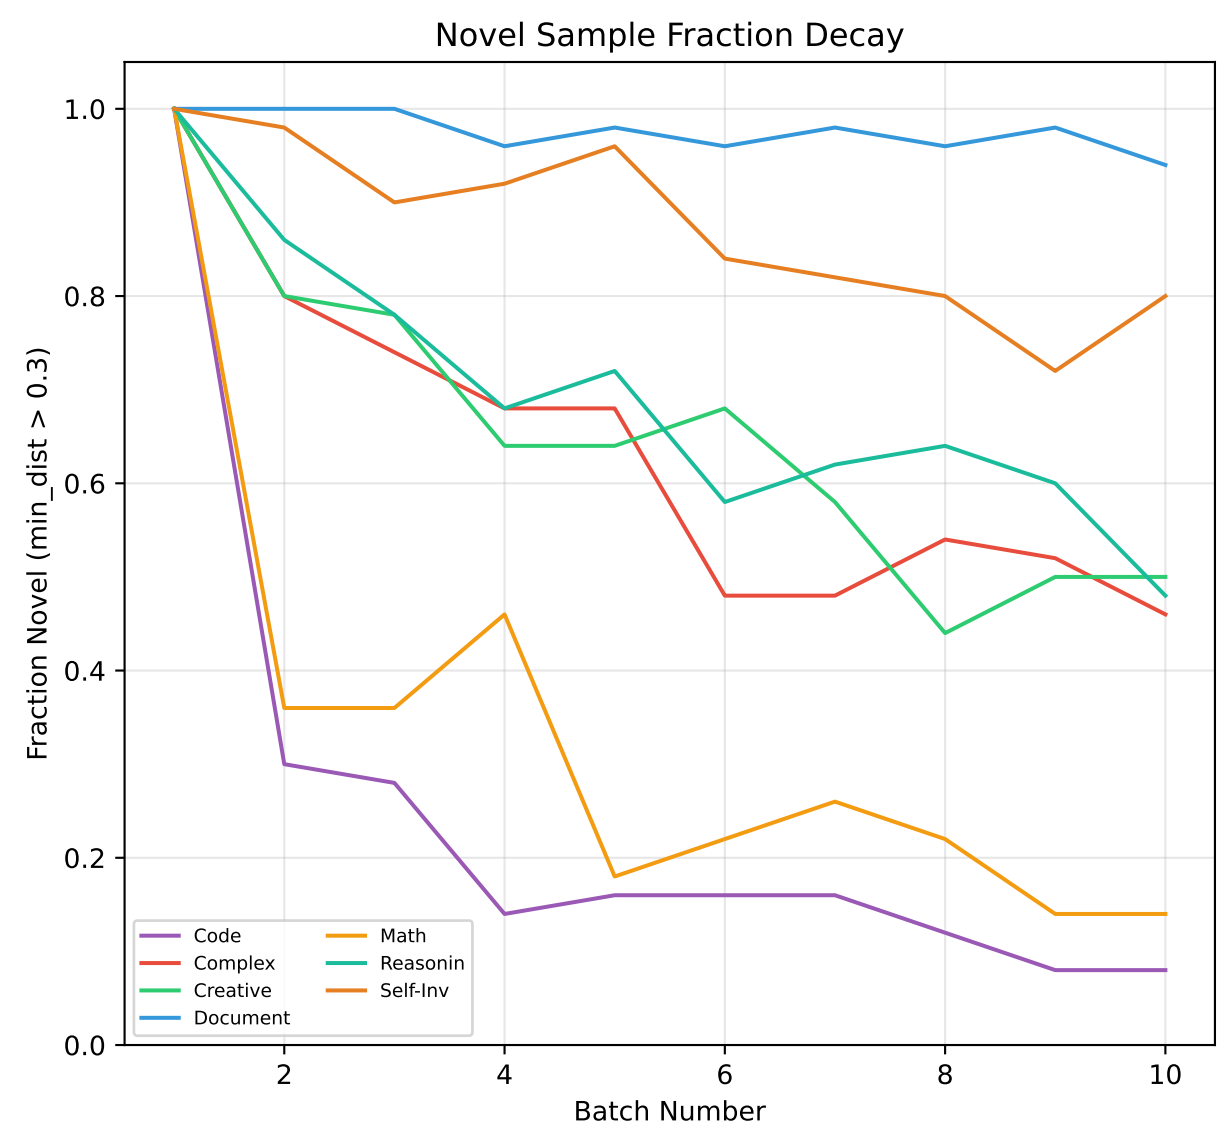

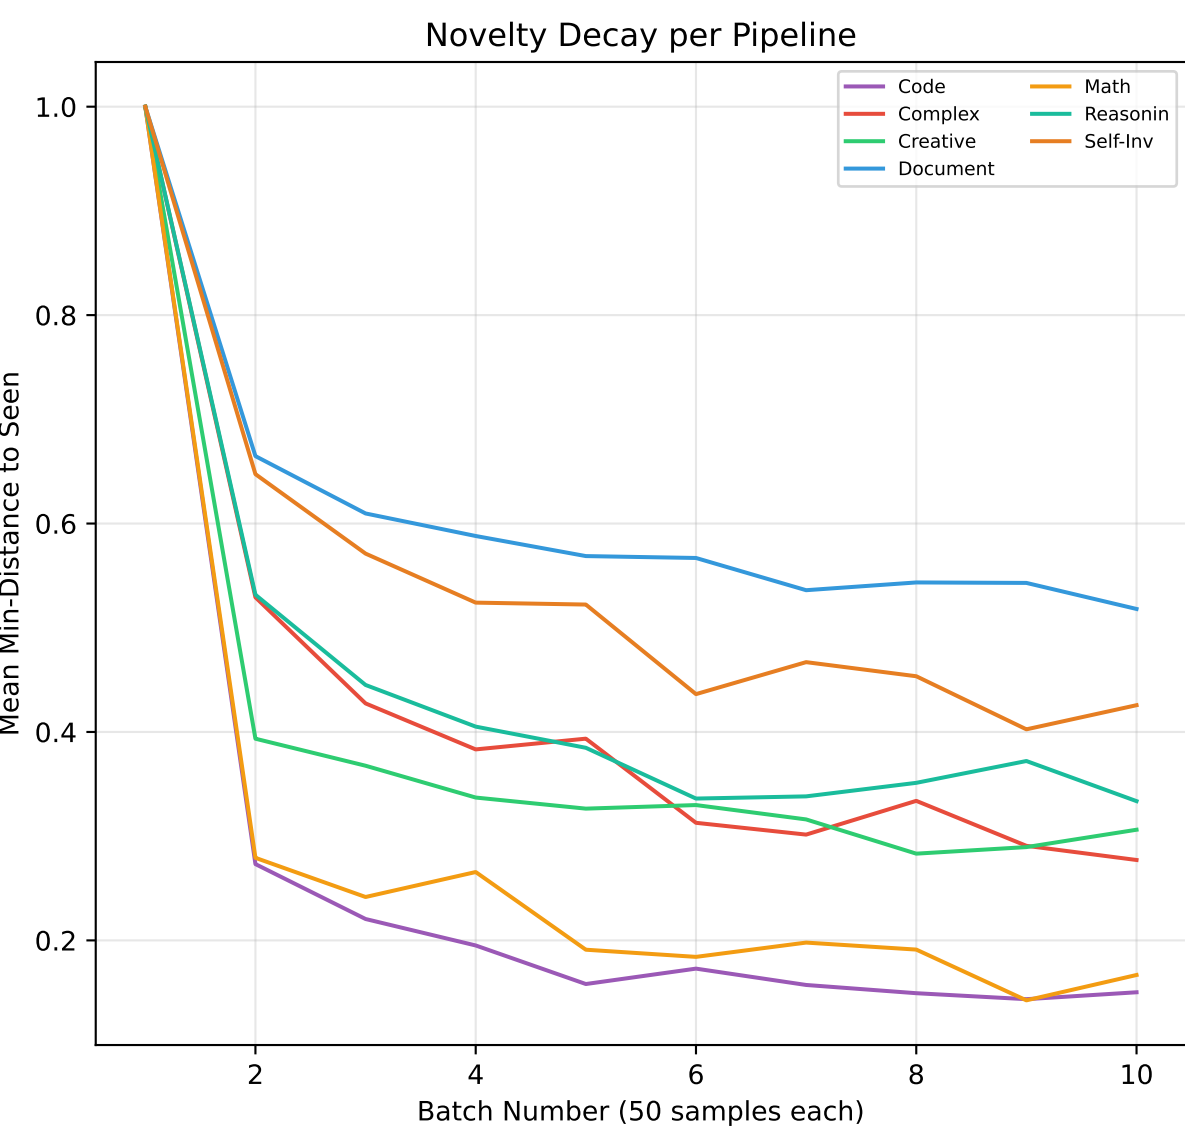

Fig 197: Temporal Batch Novelty Decay Analysis

Temporal Novelty Decay Summary

Novelty half-life (batches of 50):	
Self-Inversi	0.9 batches
Complex QA	0.7 batches
Reasoning	0.6 batches
Document QA	0.6 batches
Code	0.4 batches
Creative	0.3 batches
Math	0.3 batches

Final batch novelty (last batch):	
Document QA	0.518
Self-Inversi	0.426
Reasoning	0.334
Creative	0.306

Interpretation:
High half-life = sustained novelty
Low final novelty = fast saturation
